

To Whom it may Concern

I am pleased to recommend Charles Kwarteng, who successfully completed the Master of Science in Data Science programme at the University of Europe for Applied Sciences and graduated in February 2025. I had the opportunity to teach Charles in multiple courses and to observe his academic development, professional conduct, teamwork, and intellectual maturity throughout his studies.

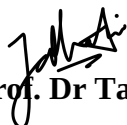

Charles was enrolled in my course Data Analytics, where he demonstrated sound analytical reasoning, academic curiosity, and the ability to interpret data in a meaningful and structured manner. He engaged consistently with the course content and contributed constructively to discussions, practical activities, and collaborative learning tasks.

Charles also completed the course Data Science and Business, which I co-taught with Prof. Ebby George Varghese. During the final project presentation, Charles stood out for his structured approach, clear communication, and ability to connect analytical thinking with broader business and strategic considerations. Prof. Varghese also encouraged him to further develop his interest in strategy, recognising his ability to work effectively in teams and contribute to higher-level problem solving.

Across my interactions with Charles, I found him to be disciplined, respectful, reliable, and professionally minded. He showed a strong interest in applying data science concepts to real-world business and technology challenges, and he consistently demonstrated the willingness to learn, improve, and collaborate with others.

I fully recommend Charles for professional opportunities. I am confident that he will bring dedication, analytical rigour, teamwork, and a strong work ethic to any organisation he joins. Please feel free to contact me should further information be required.

Sincerely,

Prof. Dr Talha Ali Khan

Professor

Vice President of Research

Program Leader of MSc Data Science

University of Europe for Applied Sciences

Potsdam, Germany
